

PHYSICAL THERAPIST

EXPERIENCED Physical Therapist wanted to join the team at our San Francisco orthopedic, sports medicine clinic, The Stone Clinic. Come to work in a unique cutting edge, concierge-style clinic, the only multidisciplinary office combining medicine, rehabilitation and research under one roof. The Stone Clinic, created by Dr. Kevin Stone, is a place where patients can have it all. In this model, patients come in for an orthopaedic examination and digital MRI and XRay imaging if needed and then with a diagnosis begin their recommended treatment such as physical therapy, all in one visit. Patients who desire are looked after on an ongoing basis as part of our outcomes studies by our research department. This may sound like a large scale operation, but we prioritize the personal approach with each patient and our physical therapy team works very closely together.

About the Position
