

H&D has become a leader in providing premium physical therapy service in the New York metro area by practicing values-driven healthcare. Personalized one-on-one treatment, multidisciplinary offerings, and a function-based approach to wellness through the mind, body, and spirit is what H&D's patients and clients have come to expect. H&D's dedication to musculoskeletal health got the attention of a variety of Fortune 500 companies, at which H&D is now the exclusive physical therapy provider.

We have refined our craft by developing our values-driven organization around the collective passions and strengths of our team. These strengths have distinguished us and allowed us to build remarkable relationships. We pride ourselves on our talented multidisciplinary team, which includes physical, occupational, vestibular, and certified hand therapists.

The Position

H&D Physical Therapy is looking to fill the position of on-site full-time physical therapist for one of our corporate client. This unique role gives the right candidate the opportunity to be the first point of contact for helping diagnose and treat musculoskeletal issues for active professionals. In addition to treating patients one-on-one every visit, the candidate also gets to communicate with other healthcare and fitness professionals to create a culture of wellness for employees.

Responsibilities

- Examine and evaluate patients
- Develop and implement treatment plans based on individual needs of the patient.
- Educate patient on anatomy, physiology, pathology, and prognosis
- Complete required documentation in an accurate and timely manner

The ideal candidate will have...

- A minimum of a BS in Physical Therapy
- A minimum 3 years of experience
- CFMT, working towards CFMT or someone with FMT background.
- Exceptional communication and clinical skills and a strong desire to learn
- Strong differential diagnosis skills due to the quantity of patients seen via direct access
- The ability to treat independently
- A belief that the body should be evaluated and treated as a whole
